

INVESTIGATIVE TASK FORCE

MAJOR CRIMES & ARTIFACT THEFT DIVISION • REGIONAL BUREAU

CLASSIFIED / ACTIVE

CASE FILE:	RE-2026-BF094	DATE OPENED:	October 15
CASE TITLE:	The Stolen Necklace	CLASSIFICATION:	Active Investigation
ASSIGNED:	Detective Division	TARGET/OWNER:	Blackwood Foundation

I. EXECUTIVE CASE SUMMARY

The Blackwood Foundation has officially reported the theft of the **Muninn Necklace**, a historically significant artifact valued at approximately **\$3.8 million**.

The necklace was prominently displayed during the Foundation's annual charity gala on the evening of **October 14** and was discovered missing during a standard post-event inspection.

Initial scene reviews indicate no signs of forced entry, and no confirmed security breach has been identified. Multiple guests, staff members, and contractors were present at the venue during the critical timeframe.

II. STOLEN PROPERTY INVENTORY

ITEM NAME:	Muninn Necklace
EST. VALUE:	\$3,800,000 USD
CURRENT STATUS:	MISSING / STOLEN
DESCRIPTION:	A rare, priceless historical necklace displayed as the featured centerpiece of the Foundation's collection. The artifact was exhibited during the charity gala as part of the exclusive private donor viewing program.

III. VERIFIED FACTS & BASELINE

The following parameters have been independently verified by forensic & security teams:

- ✓ The Muninn Necklace was confirmed present during gala preparations.
- ✓ The necklace formed part of the Private Donor Viewing exhibition.
- ✓ The theft was not discovered until after the event had concluded.
- ✓ Multiple individuals had legitimate, authorized access to the venue during the event.
- ✓ No confirmed physical forced entry has been identified at the primary exhibit site.
- ✓ A separate security incident was reported elsewhere in the building during the evening.

IV. ASSIGNED INVESTIGATION MANDATES

MANDATE 1 — WHO (IDENTIFY SUSPECT)

Review all available evidence and determine the individual responsible for the theft of the Muninn Necklace. Evaluate all persons of interest to establish identity and motive.

- **Primary Objective:** *Identify the thief.*

MANDATE 2 — HOW (RECONSTRUCT METHOD)

Determine how the Muninn Necklace was removed from Foundation custody. Review all available physical and digital evidence to reconstruct the precise sequence of events enabling the theft.

- **Primary Objective:** *Reconstruct the method.*

⚠ INVESTIGATIVE WARNING & DIRECTIVE

Not all suspicious activity is necessarily connected to the primary theft. Lead investigators and assigned officers are explicitly advised to strictly distinguish between:

- **Verified facts** vs. **Witness observations**
- **Assumptions** vs. **Unrelated incidents**

All official conclusions must be rigorously supported by physical or corroborated evidence.

INVESTIGATOR'S NOTE — ORIENTATION DIRECTIVE

At present, several critical aspects of the incident remain unexplained. Assigned junior investigators must avoid premature conclusions and focus on establishing a complete, timeline-backed reconstruction of events before formalizing suspect identification.

DOSSIER ATTACHMENTS NOTICE: Assigned investigators have been provided with supplementary File Packet E01-B containing witness statements, interrogation records, security logs, facility blueprints, and photographic exhibits relevant to Case RE-2026-BF094.
